Potential competing interests: No potential competing interests to declare.

Recommendations:

- **Include Case Studies:** Adding real-world case studies or simulations to demonstrate the practical effectiveness of the proposed AI techniques.
- **Expand Technical Details:** Providing more in-depth technical information on the machine learning models and their training processes.
- **Highlight Applications:** Discussing specific applications and potential industry impacts in more detail.
- **Detailed Future Work:** Elaborating on future research directions and potential challenges in integrating AI with wireless networks.
