Potential competing interests: No potential competing interests to declare.

Firstly, I would like to thank the author for the effort put into writing this paper.

Here are some development notes:

In the abstract, I suggest writing more details about the research methodology. Also, provide readers with information about the sampling method.

In the introduction, I recommend that the research gap be clearly stated.

I recommend stating the research objectives in order to link the conclusions to them.

Where is the literature review section? Must be added.
