Follicular T-Cell Lymphoma

National Cancer Institute

Source

National Cancer Institute. *Follicular T-Cell Lymphoma*. NCI Thesaurus. Code C80375.

A lymph node-based peripheral T-cell lymphoma of T-follicular helper (TFH) cells, with a predominantly follicular growth pattern. It lacks characteristic features of angioimmunoblastic T-cell lymphoma such as proliferation of high endothelial venules or extrafollicular follicular dendritic cells. (WHO 2017)
