Potential competing interests: No potential competing interests to declare.

The conducted work is good, but it needs some improvement. The following comments should be addressed:

1. Add recent literature.
2. Add standard deviation in bar charts where the average is taken.
3. Add relevance of current research to industry implementation.
4. Add scientific reasoning/soundness to the obtained outcome.
5. Figures 3 to 5 can be shown in one figure as a to c.
