Potential competing interests: No potential competing interests to declare.

Authors have introduced fixed point results in the cone metric space. I have reviewed the manuscript; however, it lacks the following.

- 1: The abstract needs to be more comprehensive.
- 2: The layout of the manuscript needs to be improved.
- 3: The introduction section needs more attention, and sentence formation is very weak.
- 4: The manuscript lacks motivation for the work; authors need to highlight the significance of the concepts introduced and the contribution of this work to the existing literature and scientific community.
- 5: The conclusion section must be revised again, highlighting the significance of the work done.

Authors must improve this manuscript before publishing it in a well-reputed journal.
