The paper is very interesting and addresses major society issue. I however observe as follows:

1. The methodology and recommendation should be included in the abstract.
2. Theoretical framework is not established.
3. The methodology should be comprehensive, it is too shortened.
4. Lack of literature to show gaps in knowledge is indeed a minus to the paper.
5. What is the objective of study?
6. The problem statement is not clearly defined.
7. The introduction is not comprehensive enough.
8. Why did the author present the data first?
