

Review of: "Supply Chain and Digital Transformation of the Tire Manufacturing Company during the COVID-19 Pandemic: A Case Study of PT. X"

Mehmet Bağış

Potential competing interests: No potential competing interests to declare.

In case studies, the reason for choosing this specific company could be elaborated on in greater detail. It would have also been possible to conduct interviews with the company's executives. However, as far as I can see, the argument seems to lack a data-based foundation. No data appears to be presented within the case study. The argument could have been substantiated by data, even if only secondary data. Nonetheless, I believe this article provides valuable insights into the impact of Covid-19 on the supply chain. Best regards.
