Dear Rao

I hope you are doing well. Thank you for your effort and this nice paper. My recommendations are as follows:

- I. You need to write about your finding and results clearly in the abstract.
- II. I could not understand your contribution clearly.
- III. I think it is a brief report. So, your evidence or findings must be powerful and so strong.
- IV. I cannot see valuable information or evidence about using these loss functions in cancer research.
- V. If I were you, I would try to use different examples or develop the report using different loss functions such as KL convergence, focal loss etc.

Best regards

Milad
