

Review of: "Political Economy and Ecology of International Regional Development: Indonesia Urban and Rural Development Loans from the Asian Development Bank (ADB)"

Ria Christine Siagian

Potential competing interests: No potential competing interests to declare.

INTRODUCTION

- The introduction needs to be re-organized to provide a clear and comprehensive overview of the background to the research problem as well as an adequate framing for the paper. The authors need to justify why theories of EGT and SIGT are stated as faulty. The authors need to clarify whether they found out EGT and SIGT faulty from research or from other sources, since Method says "Applying the political economy (or history) of development economics, we deconstructed EXGT and SIGT and discovered that these theories are faulty"

Materials and method

- The authors need to revise the materials and methods, to draw information in details on how they did for the research. The section should include a clear and brief description of your research procedures. The authors need to explain how they combine theory deconstruction, reconstruction and empirical testing.
