The manuscript presented by the authors is incomplete since it only presents an introduction and a conclusion. It can be used as a starting point for a more complete article. It is not clear whether this article is a literature or systematic review. For the first case you need to have subsections that analyze different visions of the chosen topic. In the second case, it is necessary to develop a methodology in accordance with a search strategy and a flow diagram with the selected articles. It would also be of interest to create tables to improve the understanding of the results obtained in the different studies.
