**Potential competing interests:** No potential competing interests to declare.

This article is interesting to give contribution an alternative for teams to establish groups within their number to take additional responsibilities in terms of technical rescue with commensurate additional learning to be formally logged, as this would allow for a degree of certification and formal recognition of the knowledge of this particular community of practice while allowing for a degree of localized autonomy and variation.

Authors need to add research objectives and methods to the abstract and use up-to-date references for the last ten years, preferably the last five years.
