Haemophilus Influenzae B Vaccine

National Cancer Institute

Source

National Cancer Institute. *Haemophilus Influenzae B Vaccine*. NCI Thesaurus. Code C1126.

A vaccine against serotype b of the Gram-negative bacterium *H. influenzae* (Hib). Hib vaccines contain polysaccharide-protein conjugate antigens that produce greater host immune responses than first-generation purified polysaccharide vaccine. These vaccines may differ with regard to use of protein carriers, polysaccharides, diluents, and preservatives.
