

# Review of: "Adverse Effect of Diclofenac Exposure during Pregnancy on Mother and Fetus; A Systematic Review"

Carotenuto Rosa<sup>1</sup>

<sup>1</sup> University of Naples Federico II

**Potential competing interests:** The author(s) declared that no potential competing interests exist.

This review highlights the incompleteness and inadequacy or lack of data regarding the effects of Diclofenac used during pregnancy; it reaches its conclusion using only 3 papers deemed most appropriate. The intent is to push further studies in humans but is not well evidenced by lacking a section regarding the purposes for which this review was written. This paper could be published but at the very least the authors should better discuss the available data and state the purpose of the review.
