

Review of: "Surgical treatment of Temporal Lobe Epilepsy: comparative results of selective amygdalohippocampectomy versus anterior temporal lobectomy from a referral center in Brazil"

Ayataka Fujimoto

Potential competing interests: The author(s) declared that no potential competing interests exist.

I have compared the SJSCH and SJSCH.2. 562 parts have been revised. Even though, I still have some more suggestion, the authors have revised in terms of cost issues.

I have endorsed this revision.
