Indeed this research work is a good effort. However, the following areas need to be revisited:

- 1 .The Parenthetical Citation in Paragraph 1 linn 4 is not correct. Please format in accordance with APA referencing style
2. The variable “ academic achievement” need to be defined!
3. Qualitative data cannot be analyze using statistical analysis. Your methodology should be a mixed method, which will involve the collection analysis of both quantitative (Using questionnaire) and qualitative data (Using interview protocol).
4. State the full meaning of "MD" see Table 2
- 5.Cronbach's Alpha and p-values are not necessary in Table 2
6. Reliability should be reported under methodology
7. The validation of the instrument should be reported
