

# Review of: "Sero-prevalence of Viral Hepatitis B and C infection and associated factors among Pregnant Women in Southeast Ethiopia: Community-based crossectional study"

Neima Nora Candy

Potential competing interests: No potential competing interests to declare.

(This paragraph (Paragraph #6) in the introduction is too long to end up with just one reference. I will suggest including a reference for each sentence instead). And the reference numbering says #9 for this paragraph whereas the sentence above this has a reference number of #15, could you please take a look and rearrange reference numbering. The paragraph that starts with "since 2007, efforts have been made...".

Could you also mention something about the estimated population for the 3 communities chosen for the study under the study population?
