

Review of: "Toxicity of Olea africana in Artemia Salina and Mice"

G.F. Abdurrahman

Potential competing interests: No potential competing interests to declare.

A very good manuscript, just a few suggestion for the improvement of the manuscript. The background part is short, please read and add more literature. Mention the OECD guidelines in acute and subacute toxicity. Mention the solvent used in dilution of the extract when making concentration series. Insert a natural photo of the plant in the manuscript. Please modify the title of the paper. Specify which part of the plant was collected. Reference used are mostly old, update to the latest reference please.
