Review of: "Safe City Concept in Smart City Planning"

Amin Pujiati[1]

1 Universitas Negeri Semarang

the topic is interesting but it could benefit from a more in-depth analysis. Providing specific examples, quantitative data, or detailed case studies could enhance the credibility and richness of the research. The text primarily emphasizes the technological aspect of creating safe cities. It might be valuable to include discussions on community involvement, governance structures, or socio-economic factors that also play crucial roles in ensuring safety within smart cities. The paper could deepen its analysis and provide a more comprehensive understanding of the challenges and opportunities in integrating safety into smart city planning in India.
