Neuroendocrine Cell Hyperplasia of Infancy

National Cancer Institute

Source

National Cancer Institute. *Neuroendocrine Cell Hyperplasia of Infancy*. NCI Thesaurus. Code C120169.

A form of interstitial lung disease characterized by increased numbers of pulmonary neuroendocrine cells, typically presenting in the first year of life with persistent tachypnea, retractions, crackles and hypoxemia that has a highly specific chest CT pattern that includes ground-glass opacities and air-trapping.
