Nasal Cavity and Paranasal Sinus Lethal Midline Granuloma

National Cancer Institute

Source

National Cancer Institute. *Nasal Cavity and Paranasal Sinus Lethal Midline Granuloma*.

NCI Thesaurus. Code C8196.

An aggressive, progressive, and destructive lesion affecting the nasal cavities, paranasal sinuses, and the palate. The vast majority of cases are malignant lymphoproliferations affecting the midline of the face in patients with nasal type extranodal NK/T-cell lymphoma.
