Potential competing interests: No potential competing interests to declare.

## Suggestions:

1-While in-silico and biological activity results are provided, confidence intervals, p-values, or other statistical measures are missing, which weakens the data's reliability and generalizability.

2-The literature review lacks breadth, particularly with newer references. This gap limits the study's context within recent research developments. You can benefit from some references:

[10.30492/ijcce.2023.2000120.5971](https://doi.org/10.30492/ijcce.2023.2000120.5971)

<https://doi.org/10.1002/jbt.22969>

3-The synthesis and biological testing processes lack critical procedural details, impacting reproducibility and raising concerns about the data's reliability.
