

Review of: "The Influence of Hot Extrusion on The Mechanical and Wear Properties of an Al6063 Metal Matrix Composite Reinforced With Silicon Carbide Particulates"

Sunder Singh Prathap Singh

Potential competing interests: No potential competing interests to declare.

1. There are no figures in the experimental work section. If possible, add some figures related to fabrication and testing.
2. Rectify the grammar and spelling-related errors.
3. Add ASTM standards for all the experiments.
4. Increase the quality of images through software like Origin, Sigmaplot, etc.
5. Add required references in all the places in the results and discussion parts.
6. Enhance the quality of the SEM.
