

Review of: "Achieving Sustainability in Smart Cities Mission in India through Universities' Innovation in India"

Roopali Fulzele

Potential competing interests: No potential competing interests to declare.

The Author has focused on a very interesting, relevant and highly required topic for the research. The work provided a comprehensive analysis about the progress and achievements of those sustainability goals that are related to Smart Cities in India. The second and third objectives of the study are not written properly and hence, proper meaning of these objectives cannot be drawn. Also, proper research methodology should be included for better clarity of the analysis done. However, the author should also cite the latest contribution, progression, achievements of related Sustainability Goals especially during and after COVID 19. The study needs to be well-structured and formatted.
