Potential competing interests: No potential competing interests to declare.

It is a good research conducting in Kenya but there is some points need to be clarified:

1- How the clinical assessment of the cases were

Carried .

2- it is unclear whether we assessed only opioid

Substance or other substances.

3- The severity of addiction wasn't assessed.

4- I think we can compare between the group on

Substitute therapy and those not.

Good luck .
