Great job, but there is a few points to be discussed:

1. A few Tables and Figures needs to be mentioned in the paper like Table 14 and Figure 1.
2. Needs to write down the results in a more clear way
3. A little bit confused by the bullets in the paper, like in 4.3 it is experiment 3 but can not figure out where is experiment 1 and 2 in detailed as experiment 3

But overall, great job
