**Potential competing interests:** No potential competing interests to declare.

One suggestion to improve the quality of the article could be to provide more details on the methodology used, including a more in-depth explanation of the algorithms and techniques employed. Additionally, it would be helpful to include more visual aids such as diagrams or flowcharts to help readers better understand the proposed system.

Another suggestion could be to include a section discussing the potential limitations or challenges of the proposed system, as well as possible future work to address these issues. This would provide a more balanced view of the research and help readers understand the potential areas for further development.

Overall, the article presents an interesting and innovative approach to a relevant problem, and with some additional details and clarification, it could be further improved.
