Potential competing interests: No potential competing interests to declare.

In the introduction, the last paragraph should have the objectives of the research, in order to clarify the performed study on the plant.

In Material & Methods

2.1. Plant Collection

Figure 1 illustrates, and Fig 2 shows; both sentences should be changed to past tense.

In the statistical analysis, it is recommended to mention the statistical tools and the version by which the T-tests were performed.

In the subheading 2.5.2, and all other headings of material and methods, it should be observed that the author has used present tense, which would be changed to past tense.

In the conclusion, it is recommended to give more description as a concluding statement.
