

# Review of: "The Eisenlohr-Farris algorithm for fully transitive polyhedra"

Tanmoy Chakraborty

**Potential competing interests:** No potential competing interests to declare.

The manuscript is well written and it has a high scientific significance. But the manuscript needs some revision before acceptance.

1. Conclusion section needs to be incorporated
2. References are not mentioned randomly. It must be corrected.
3. Some relevant important references are missing. These need to be incorporated.
4. Recent references are to be added.
5. English language of the manuscript needs some minor revision.
