Potential competing interests: No potential competing interests to declare.

Introduction

Keywords: Reconsider the choice of only 5 keywords. Ensure that the selected terms accurately reflect the central themes of your article and are relevant in the context of research on organizational homeostasis from a quantum perspective. -Systemic approach to the term "organization": Introduce a detailed explanation of the term "organization" from a systemic perspective. This could include how elements and interactions within an organization are perceived and managed from a systemic standpoint, highlighting the inherent complexity and interconnections.

Development of the "MCE" (Maintenance of Corporate Coherence) Concept

Elaborate on the explanation of the "MCE" concept. Provide concrete examples or case studies illustrating how MCE can influence the stability and adaptability of an organization.

Literature Review

Relation of "MCE" to cognitive or creativity processes: Develop and explain the relationship between Maintenance of Corporate Coherence and cognitive and creative processes. Refer to relevant theories and other works that have addressed the connection between organizational stability and creative capacity.

Applied Methodology: Introduce a specific section or subsection dedicated to the methodology used in your research. Describe in detail the methods employed to collect and analyze data, providing a solid foundation for understanding the results.

Contrast theories with results: In the results section, contrast the theories discussed in the literature review with the findings obtained in your research. Analyze how the results support or challenge existing theories, highlighting any unique contributions of your study to the field.

In-depth conclusions: When concluding, go beyond summarizing the results. Delve into the practical and theoretical implications of your research, discussing possible applications in real organizational settings and suggesting future directions for research in this specific field.

These suggestions aim to improve the clarity and coherence of your article, ensuring that each section is developed soundly and contributes to the overall goal of exploring organizational homeostasis from a quantum perspective.
