Dear Editor

The title and subject of this research are very interesting, and I think that with some minor corrections it's suitable for publication.

1. Authors used more abbreviations in the work. For example, "PU" in the abstract? And so on. If one concept is repeatedly used throughout the manuscript, it is recommended to use an abbreviation.
2. Methodology must be expanded and detailed.
3. Findings are suitable, but the discussion and conclusion can be written more attractively.
4. References must be updated.
