

Peer Review

Review of: "Does Accreditation Improve Protections of Human Research Subjects and the Quality of Institutional Review Board Reviews?"

Asaad Babker¹

1. Gulf Medical University, United Arab Emirates

Here are some suggestions for the current article. Implementing these improvements can significantly enhance the article's persuasiveness, actionability, and comprehensiveness:

- Provide more detailed guidance or frameworks on how the proposed evaluations could be conducted, including specific study designs, data collection methods, and analysis approaches.
- Delve deeper into how accreditation potentially influences ethical standards, public trust, and compliance with federal regulations beyond just safety metrics.
- Offer recommendations for policy changes or incentives to encourage rigorous evaluation of accreditation outcomes.
