Syringomyelia

INSERM

Source

INSERM. (1999). Orphanet: an online rare disease and orphan drug data base.

Syringomyelia. ORPHA:3280

Syringomyelia is characterised by cerebrospinal fluid (CSF)-filled cavities (syrinx) inside the spinal cord, either as a result of a known cause (secondary syringomyelia, SS) or, more rarely, due to an unknown cause (primary syringomyelia, PS).
