Review Report of the manuscript entitled "Are We in a Housing Bubble? Empirical Evidence From Portugal"

1. The introduction section gives good information but without citation. Include proper citation; without this, it looks like a good essay.
2. What is the justification for the methodology that is used? Why is it good and suitable for your research?
3. What other methods are available for bubble detection? Are you aware of those, like Ahmed, R., Jawaid, S. T., & Khalil, S. (2021). Bubble Detection in Housing Market: Evidence From a Developing Country. SAGE Open, 11(2). <https://doi.org/10.1177/21582440211006690> (Original work published 2021)?
4. I wonder how you discuss measurement methods in section 3.2 without giving its references. Did you make these calculations, or did you adopt these formulas? Clarify.
5. The research study should encompass all aspects of the topic under investigation. It looks very brief.
