# Liver and Intrahepatic Bile Duct Non-Epithelial Neoplasm

National Cancer Institute

## Source

National Cancer Institute. *Liver and Intrahepatic Bile Duct Non-Epithelial Neoplasm*. NCI Thesaurus. Code C7107.

A benign or malignant non-epithelial neoplasm that affects the liver parenchyma and intrahepatic bile ducts. Representative examples of benign non-epithelial neoplasms include hemangioma, angiomyolipoma, and solitary fibrous tumor. Representative examples of malignant non-epithelial neoplasms include lymphoma, angiosarcoma, and undifferentiated (embryonal) sarcoma.
