**Potential competing interests:** No potential competing interests to declare.

I started reading the article whose title sounds interesting. Unfortunately, as I continued reading, I noticed the inconsistency and weakness of the text.

It is a series of sentences extracted from previous articles inserted without any reworking, so that in the end the text lacks scientific meaning.

I started to mark along the text all the corrections, but my suggestion is for the authors to go deeper into the topic they wish to cover and rewrite the article again.
