

Review of: "Evaluating the parameter of visibility adopted for CPTED for user safety in public open space of Haat Bazar: Isovist and VGA"

Nanthini Subbiah

Potential competing interests: No potential competing interests to declare.

This research impressively utilizes a systematic scientific approach, exploring the fusion of CPTED principles and Space Syntax. It holds significant potential in urban planning. However, a clearer justification for the choice of the case study is needed. Nonetheless, it exemplifies interdisciplinary research, offering valuable insights into urban safety and design.
