

Review of: "Integrating Mental Health Support in Emergency Planning and Disaster Risk Mitigation Strategies"

Edith Kwobah

Potential competing interests: none

A potentially useful paper.

I suggest improving the description by considering the following questions..

1. what is FEMA, it is not defined the first time it is mentioned
2. Who offers the counselling, qualifications, of staff numbers?
3. Who does it serve, give more details on target population
4. what is the geographical scope, city etc
5. What is the evidenced based intervention offered
6. how is the work evaluated and monitored for effectiveness and impact.
7. How many people have been served since onset
8. What are the challenges
9. What are the lessons others can learn from your experience.
