**Potential competing interests:** No potential competing interests to declare.

Thanks to the editors for giving me this opportunity to review this wonderful work.

## **comments:**

**abstract:** in the abstract, the author needs to mention the methodology and the findings and conclusions. Also, the key words need to be written.

**introduction:** here some references are needed to be added.

**tables:** the tables need to have titles in order to clarify for readers what these tables are about.

**regarding** 4.7. Significant Planned Discrimination by the Toxic Leaders in Higher Education Institutions

The participants have indicated the following significant and planned discriminations in many institutions that are identified as follows:

Here, it is better for the author to discuss these points without putting them in the research as bullet points, because it is crucial in the research to have discussions, arguments, and explanations instead of bullet points.

Other parts are good.

The topic is interesting.
