The paper untitled "Unravelling the Phytochemical and Pharmacognosy Contour of Traditional Medicinal Plant: *Pterocarpus Marsupium Roxb*" is a review article summarizing the phytochemistry and pharmacology of *Pterocarpus marsupium* Roxb, which is a medicinal plant used in traditional medicine in India.

The sections of the article are effectively organized and structured. However, the following comments are provided for content development and improvement:

- Begin with general information about herbs before delving into specific details about the studied plant (Abstract).
Ensure a smooth transition from general to specific information.
- Address the repetition of citations regarding pharmacological activities to enhance the overall coherence of the content.
- Consider including a picture of the plant in the botanical description section.
- Include the vernacular name of the plant.
- Italicize all scientific names to comply with formatting conventions.
- You have to check the grammatical errors.
