The paper is technically sound, and the conclusions are supported by the findings. There are, however, various issues that must be corrected.

- 1.- It is recommended that abbreviations be accompanied with their description. See the abstract for "OM" against O&M in the list of abbreviations.
- 2.- CSP is missing in the list of abbreviations.
- 3.- Tables 2, 3 4 and 5 are not referred to in the text. This must be done.
- 4.- In Table 6, the last two columns contain information not commented in the paper.
- 5.- The list of references at the end does not have a consistent format.
