Potential competing interests: No potential competing interests to declare.

1. This is an interesting article, well-written and informative.
2. Critically ill were excluded from the study: Can't they be critically ill because of lack of care after a negative disclosure outcome? The reviewer feels the study might have missed a critical population.
3. Data collection tools: The reviewer recommends references to be provided from where questions regarding the outcome of the disclosure have been adopted.
4. The reviewer feels that informed consent is a prerequisite for research on its own and does not ensure privacy or confidentiality. Hence, the authors need to rewrite the sentence.
