

Review of: "IoT Noise And Air Quality Observation System"

balakrishnan Balakrishnan

Potential competing interests: No potential competing interests to declare.

1. In the Introduction section, the drawbacks of each conventional technique should be described clearly.
2. You should emphasize the difference between other methods to clarify the position of this work further.
3. The wide ranges of applications need to be addressed in the Introduction.
4. Add the advantages of the proposed system in one quoted line for justifying the proposed approach in the Introduction section.
5. In the introduction, the findings of the present research work should be compared with the recent work in the same field towards claiming the contribution made. Kindly provide several references to substantiate the claim made in the abstract (that is, provide references to other groups who do or have done research in this area).
6. Authors can refer to some latest related works from reputed journals like IEEE/ACM Transactions, Elsevier, Inderscience, Springer, Taylor & Francis, etc.
7. In the Result Analysis section, make use of the class diagram to represent the code part of the implementation. It gives complete details of the methods used in providing the service through the recommended proposed model.
8. Try to concise the conclusion.
9. Discuss the future plans with respect to the research state of progress and its limitations.
10. The writing of the paper needs a lot of improvement in terms of grammar, spellings, and presentations. The paper needs careful English polishing since there are many typos and poorly written sentences.
