# Soft Tissue Tumor of Uncertain Differentiation

National Cancer Institute

## Source

National Cancer Institute. *Soft Tissue Tumor of Uncertain Differentiation*. NCI Thesaurus. Code C7148.

A benign, intermediate, or malignant soft tissue tumor in which the line of differentiation is uncertain. Representative examples include neoplasm with perivascular epithelioid cell differentiation, alveolar soft part sarcoma, desmoplastic small round cell tumor, epithelioid sarcoma, extraskeletal myxoid chondrosarcoma, and synovial sarcoma.
