Potential competing interests: No potential competing interests to declare.

In this work authors obtained the exact solutions of field equations in Creation-Field cosmology for the Kantowski-Sachs space-time. I find typographical errors in the title of the paper (Kantowski-Sachs) which is repeated in the body of the paper also. Some more discussion on the results to be included mentioning the reduction of the obtained results to the earlier ones available in the literature under particular conditions.

I recommend the manuscript for the above revisions before publication.
