Review of: "Additive and Multiplicative Operations on Set of Polygonal Numbers"

Sergio Falcon[1]

1 Universidad de Las Palmas de Gran Canaria

Potential competing interests: No potential competing interests to declare.

The author makes use again and again of a previously known formula without making any mention of any of the previous researchers.

The formulas indicated in the text are verified for small values of the parameters that make them up, but no formula is rigorously proven.

And it is quite perplexing to see that the bibliography is made up of 13 articles, ABSOLUTELY ALL of which are his! And of those articles, only the first one is mentioned in the text.

He could cite, for example, Polygonal numbers, Overtone Chipatala, A report submitted in partial fulfillment of the requirements for the degree Master of Science (2016), available as https://core.ac.uk/download/pdf/77977823.pdf

For all these reasons, I believe that the article does not have the qualities to be published in your journal.
