The paper is an interesting note with respect to the role of ICT resource management in achieving organizational success. Extensive literature review is a strength of the paper with 60 sources cited by the authors. Paper is relevant and topical. It is well-written in terms of language. It provides a comprehensive overview of the said topic. An experimental methodology is also followed with findings and conclusions. This brings out the emphasis is on the strategic planning, allocation, and use of ICT resources, such as hardware, software, network infrastructure, data management, human resources, and other aspects within an organization. Case studies can be elaborated further. Advanced experimental and/or empirical techniques can be employed.
