Potential competing interests: No potential competing interests to declare.

The abstract is quite long, and the author can shorten it. Key words are good, but we can add more (knowledge, Benin).

First part Introduction is very long, maybe author can separate to two-part Introduction and Literature Review.

Literature Reviews are a necessary part of article, but authors must add new research, last five years. It is mandatory to refer to research that deals with the same problem in other destinations.

Part of the research questions and hypotheses should be shaped into chapters with a little more details.

The purpose of the study is very short and not necessary.

Short chapters of one or two sentences should be avoided.

The research sample is impressive, and the methods meet the needs of this type of research.

Part Conclusion is short and must be expanded.

References are old. The last is more than 10 years. Where are new references and new research?
