Potential competing interests: No potential competing interests to declare.

The current study delves into the influence of migration on spouses who do not migrate. By synthesizing a collection of research outcomes characterized by their robustness, the article demonstrates its merit for publication. Nevertheless, to enhance the inclusiveness of the reference materials, it is advisable to provide a comprehensive synthesis of the research methodologies employed. Furthermore, for a more profound understanding of the research outcomes and a meticulous analysis of the issue at hand, the author is encouraged to delve into each relevant characteristic in a comprehensive manner.
