

Review of: "Inequalities for m-Divisible Distributions"

Ibtisam Aldawish¹

¹ Al-Imam Mohamed Ibn Saud Islamic University

Potential competing interests: No potential competing interests to declare.

I recommend to the author to:

- 1- The abstract is too brief and concise. It needs more elaboration and clarification.
- 2- The article needs a more detailed and clarified introduction; also, there is no conclusion.
- 3- There are also no illustrative examples, just theories and proof!!
- 4- The references need revision, as all mentioned sources are very outdated.
- 5- Emphasize the results he obtained. Thus, each section should be started with a more detailed description of the results the author obtained.
- 6- The manuscript needs better language refinement.

The article needs major corrections, as it is not suitable for publication in its current state.
