Potential competing interests: No potential competing interests to declare.

Good morning!

Thank you for the opportunity to contribute to this study.

I understand that this study presents subsidies to guide managers about the medicines acquisition process. For a better understanding of the context of the study, I understand the need to present information about the public health system in Kenya, regarding the process of user access to these services. This will even contribute to a better understanding of the information "As such, all services are highly subsidized", according to the subtopic Study Setting (Method). In addition, I think that replacing the title of this article with Comparative Analysis of Medicines Acquisition Processes in An African Hospital will raise a better understanding of the proposed objectives.
